

**INCIDENT MANAGEMENT SITUATION REPORT**  
**WEDNESDAY, JULY 21, 2004 – 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Alaska Area and light elsewhere. Nationally, 250 fires were reported. Five new large fires were reported, three in the Southern California Area and one each in the Western Great Basin and Eastern Great Basin Areas. Six large fires were contained, three in the Eastern Great Basin Area, and one each in the Southwest, Western Great Basin and Southern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Montana, Nevada, New Mexico, Oregon, Washington and Wyoming.

**ALASKA AREA LARGE FIRES:**

**BOUNDARY**, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Anderson) is assigned. This fire is 20 miles northeast of Fairbanks, AK in alpine tundra and black spruce. Fire activity diminished due to an inversion. Backing fire with isolated torching was reported. Evacuation of Haystack Subdivision remains in effect.

**CENTRAL COMPLEX**, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Furlong/Gormley) is assigned. This complex, comprised of the Middle Birch Creek, Preacher Creek, Rock Creek, Crazy and Tokoma Bluffs fires, is 15 miles southwest of Circle, AK in spruce and hardwoods. Minimal fire spread was reported due to an inversion. Slow backing fire with occasional torching was reported. Structure protection remains in place in the communities of Central and Circle Hot Springs.

**TAYLOR HIGHWAY COMPLEX**, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Big Creek, and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Fire behavior was less active due to smoke cover and higher relative humidities. Very little spread was observed.

**CHICKEN FIRE**, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Goheen) is assigned. This fire is 50 miles northeast of Tok, AK in timber, hardwoods and grass. Fire activity was minimal due to lower temperatures and higher relative humidities. Structure protection remains in effect for the communities of Chicken and Boundary.

**WOLF CREEK**, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. Intermittent torching with three to four foot flame lengths was reported. The reduction in acreage is due to more accurate mapping.

**EVANSVILLE**, Tanana Zone, Bureau of Land Management. This fire is one-half mile southeast of Bettles, AK in black spruce. Fire activity was minimal due to light winds and higher relative humidities. Structure protection continues for the South Fork allotment.

**EAGLE COMPLEX**, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Carlson) is assigned. This complex, consisting of the American Summit, Edwards Creek, King Creek, Kandik River, Indian Grave Creek, Deer Creek and seven additional fires, is located three miles northeast of Eagle, AK in tundra, black spruce and mixed hardwoods.

Fire activity was minimal due to an inversion over the entire complex. Isolated patches of drier fuels burned with minimal torching.

SOLSTICE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Bird) is assigned. This incident is 57 miles northwest of Fort Yukon, AK in black spruce, hardwoods and tundra. The complex consists of the Pingo, Winter Trail, Sucker River, Black Currant Lake, Vundik Lake, Boulder Creek and Sheenjek fires. Low to moderate fire behavior with occasional flare ups and isolated torching was reported.

CAMP CREEK, Delta Area Forestry, Alaska Division of Forestry. This fire is 23 miles northwest of Delta Junction, AK in tundra and spruce. The fire spotted across the Good Pasture river yesterday and is burning towards Glacier Creek. Heavy smoke continues to hinder mapping efforts.

LOWER MOUTH, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. Heavy smoke suspended air operations.

YUKON CROSSING COMPLEX, Upper Yukon Zone, Bureau of Land Management. This complex, comprised of the Waldron Creek and Fort Hamlin Hills fires, is ten miles southwest of Stevens Village, AK in spruce, dwarf birch and tundra. No new information was reported. This will be the last report unless new information is received.

### SOUTHERN CALIFORNIA AREA LARGE FIRES:

CROWN, Angeles National Forest. This fire, located southeast of Acton, CA is in heavy brush. A transfer of command from a Type 3 organization to a Type 1 Incident Management Team (Cable) will occur. Extreme fire behavior was reported. State Highway 14 from Antelope Valley to the Los Angeles Basin is closed.

FOOTHILL, Los Angeles County Fire Department. A unified command has been established between a Type 1 Incident Management Team (Cable) and the Los Angeles County Fire Department (Bryant). This fire is three miles south of Newhall, CA in chaparral and grass. Fire behavior was minimal. Evacuations and road closures have been lifted.

PINE, Los Angeles County Fire Department. A unified command has been established between a Type 1 Incident Management Team (Gelobter) and the Los Angeles County Fire Department

(Hokanson). This fire is 14 miles southeast of Lebec, CA in heavy brush. Minimal fire activity was reported, with some smoldering within the fire perimeter.

PELICAN, San Luis National Wildlife Refuge. This fire is six miles southeast of Patterson, CA in a mix of deciduous trees and tall grass. The fire has burned four miles along both sides of a river. No further information was reported.

JALAMA, Santa Barbara County Fire Department. This fire is located 21 miles southwest of Lompoc, CA in grass and oak. Fire behavior was minimal with slow rates of spread. An evacuation of Jalama Beach Campground occurred.

MEADOW, Yosemite National Park. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located seven miles southeast of Yosemite Village, CA in timber, is being managed to accomplish resource objectives. Smoldering and low intensity surface fire and isolated torching was reported.

### NORTHWEST AREA LARGE FIRES:

ICICLE, Okanogan/Wenatchee National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is eight miles west of Leavenworth, WA in timber, litter and understory. Scattered torching and continued smoldering under the canopy was reported along with active burning within the fire perimeter. Evacuation of some residences remains in effect.

POT PEAK, Okanogan/Wenatchee National Forest. A Type 2 Washington State Interagency Incident Management Team (Johnson) is assigned. This fire is 15 miles northwest of Chelan, WA in timber. Minimal fire activity due to heavy precipitation was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

HTF = Humboldt-Toiyabe National Forest

### EASTERN GREAT BASIN AREA LARGE FIRES:

TRAIL CANYON, Moab Field Office, Bureau of Land Management. This fire is 40 miles north of Green River, UT in Douglas fir, pinyon pine, juniper and aspen. Significant rain showers over the fire decreased fire activity. This will be the last report unless new information is received.

SHEEP FENCE, Cedar City Field Office, Bureau of Land Management. This fire is 30 miles southeast of Escalante, UT in pinyon pine, juniper and sagebrush. Minimal fire activity was reported. No further information was received. This will be the last report unless new information is received.

BOF = Boise National Forest

SCF = Salmon Challis National Forest

SCS = South Central State

### SOUTHWEST AREA LARGE FIRES:

NUTTALL COMPLEX, Coronado National Forest. This complex, located 15 miles southwest of Safford, AZ in brush and heavy timber, consists of the Clark, Nuttall and Gibson fires. Creeping and smoldering fire behavior was reported in the Ash Creek drainage. Fire closure order remains in effect.

JACKET, Coconino National Forest. This fire is 13 miles southwest of Winona, AZ in brush and slash. No new information was reported. This will be the last report unless new information is received.

## OUTLOOK:

**Weather Discussion:** A much drier airmass has filtered into the western states, decreasing thunderstorm activity and lowering humidity values. The exception will be across the Rocky Mountain Area, New Mexico and northern Utah where residual moisture will lead to isolated thunderstorms over higher elevations. In Alaska, scattered thunderstorms will be a threat once again as low pressure south of the Kenai Peninsula rotates moisture into east-central sections of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>SOUTHERN CALIFORNIA AREA</b> Areas of morning low clouds and fog coastal areas. Otherwise clear.	75 to 85 coastal areas. 80 to 95 mountains. 90 to 105 valleys. 95 to 105 upper deserts. 100 to 112 lower deserts.	15 to 30% valleys. 10 to 25% mountains. 10 to 20% deserts.	Southwest to northwest 8 to 15 mph.
<b>EASTERN GREAT BASIN AREA</b> <b>Idaho, Bridger-Teton:</b> Mostly sunny and dry with light winds. <b>Utah, Arizona Strip:</b> Partly cloudy with scattered thunderstorms, mainly in northern and eastern Utah.	<b>Idaho, Bridger-Teton:</b> 68 to 82 mountains. 82 to 93 valleys. <b>Utah and Arizona Strip:</b> 75 to 91 mountains. 92 to 108 valleys.	<b>Idaho, Bridger-Teton:</b> 22 to 37% mountains. 17 to 28% valleys. <b>Utah, Arizona Strip:</b> 15 to 29% mountains. 8 to 22% valleys.	<b>Idaho, Bridger-Teton:</b> West or upslope 5 to 12 mph. <b>Utah, Arizona Strip:</b> Upslope 5 to 10 mph.
<b>NORTHWEST AREA</b> Mostly sunny.	Mostly 70s and 80s.	West of Cascades: 35 to 45% north and 25 to 30% south.  East of Cascades: Generally 15 to 25%.	Mostly Northwest 5 to 12 mph except to 20 mph coastal sections of southern Oregon.
<b>ROCKY MOUNTAIN AREA</b> Scattered afternoon thunderstorms across eastern portions with isolated dry lightning in the west.	Highs in the mid 80s to mid 90s. 70s mountains.	15 to 20% for eastern Wyoming, western South Dakota, and southwest Colorado.	Variable 5 to 18 mph.
<b>NORTHERN CALIFORNIA AREA</b> Clear except for night and morning coastal fog and low clouds. .	60s and 70s coast. 80s to 102 inland.	10 to 20% inland areas.	Southwest to northwest 4 to 10 mph.
<b>SOUTHWEST AREA</b> Partly cloudy. Drier, with isolated thunderstorms Arizona and far western New Mexico. Scattered to numerous thunderstorms remainder of New Mexico and west Texas.	Upper 60s to 80s mountains. Mostly 90s lower elevations. 100 to 110 southern Arizona deserts.	10 to 25% Arizona and western New Mexico. 25 to 40% eastern New Mexico and west Texas.	West to northwest 5 to 15 mph Arizona and western New Mexico. South-southeast 10 to 20 mph eastern New Mexico and west Texas.
<b>WESTERN GREAT BASIN AREA</b> Sunny far west and south. Partly cloudy with isolated showers and thunderstorms rest of state.	87 to 101 north valleys. 92 to 106 south valleys. 75 to 92 mountains.	10 to 20% valleys. 15 to 28% mountains.	Southwest to west 10 mph with gusts to 20 mph in the North. Southwest 5 to 12 mph elsewhere.

## FIRE SHELTER SITE SELECTION

The primary objective of every operational fire plan is to keep firefighters out of an entrapment situation. However, firefighters must always be prepared for the possibility of having to deploy their fire shelters. The key to a successful fire shelter deployment is proper site selection. Consider the following when discussing shelter deployment site selection:

- Pick a site that will keep the fire shelter away from flames and convective heat. It should also limit the amount of radiant heat that reaches the shelter
- Select an area with no fuels, or if that isn't possible, select a site in light fuels such as grass where the flaming front passes quickly. Clear the site to mineral soil if at all possible. If time is critical, pick a site with the least fuel.
- Pick natural firebreaks (e.g., wet meadows; creek beds; wet, swampy areas; large rockslides with no fuels). Note that rough terrain in rockslides may make obtaining an effective seal impossible, thus making the site unacceptable.
- Areas on the lee side of ridge tops and knobs can be effective deployment sites because convective heat and flames will generally continue rising above them.
- Wide areas that have been cleared of fuel such as dozer lines or roads can be effective deployment sites. In larger areas, don't let trucks, dozers, and other equipment occupy the best deployment sites.
- Flat areas on slopes, such as benches or road cuts, offer some protection from radiant and convective heat. Level areas like these can keep you below the path of flames and convective heat. The ditch on the inside of the road, if free of fuel, can improve the effectiveness of deploying in a road cut.
- Avoid areas that tend to funnel smoke, flames, and hot gases.
  - Narrow draws
  - Chutes
  - Chimneys
  - Saddles on ridge tops
- Know how long it takes to reach your safety zone. Crew supervisors should identify and communicate likely escape routes and safety zones.
